 **OBJECTIVE** Passionate and motivated Full Stack Developer with 2+ years of experience building and maintaining responsive websites, and web apps.

RELATED EXPERIENCE

Web Developer July 2018 - Present

Tampa 1 Technology, Thonotosassa, FL

- Built multiple web apps for internal use that employees use on a daily basis to improve the company's efficiency and performance. Used Flutter and the BloC architecture pattern to handle states and events of the apps and APIs as data sources.
- Worked on populating SQL Server tables with data from different vendors via multiple API technologies.
- Created an API that accepted Webhooks from a vendor which consumed the incoming data, made a call to the vendor's API using part of the incoming data and updated an SQL Server database with the response from the API GET request.
- Collaborated with different departments to implement new features and tools such as specific production reports and alert dashboards.

Technology Consultant May 2017 - July 2018

Tampa 1 Technology, Thonotosassa, FL

- Interacted with customers on a daily basis to help resolve business critical issues that would arise with their computers whether it is software or hardware.
- Met with customers face-to-face to help build healthy a healthy relationship with all clients.
- Led in the creation and content management of multiple websites using the CMS Wordpress for both internal and external customers.
